THE WITCHER GAME

Being based on a novel series by Andrzej Sapkowski – a bestselling Polish author – gives the game’s universe and characters credibility, authority and exceptional cohesiveness. In this harsh fantasy world abstract, absolute and unconditional ideas such as “Good” and “Evil” written in upper case letters do not exist. Instead, however, while moral good exists, the protagonist will often only have a choice between two evils, deciding on the path which he regards as the lesser evil of the two.

The story begins with Geralt reappearing after being feared dead. He is found unconscious, dazed and with only a vague recollection of past events. This way, players unfamiliar with Sapkowski’s works will be able to gradually immerse into the fantasy realm. The game features an innovative, time delayed decision-consequence system, prodding players to make their decisions seriously and with thought.

The whole world does not revolve just around Geralt. NPCs will lead their lives independently of the protagonist, yet upon interaction they can be influenced by and react to the Witcher’s actions.

It’s basically a living world, of which Geralt is only a part of, despite his involvement in its ultimate fate.

PLAY TO EARN REVOLUTION

The Witcher Game is the first decentralized NFT play-to-earn game on BSC network that integrates both 3D-animated gaming NFT and 2D unique computer-generated collective NFT marketplace.

- Each unique NFT Heroes will hold its intrinsic value complimenting the rarity, which can be traded in the marketplace.
- Players can earn by: Competing in PVP battles to win leaderboard prizes.
- Furthermore, these Collectibles are utilized in the game which will aggregate the floor price according to its attributes and activity.
- Buying and Selling Collective NFT Decorate Heroes in MarketPlace.
- Evolve and Level up your heroes and sell them in the MarketPlace.

REAL TIME STRATEGY GAME

Open Portal. Summon your heroes by opening portal using RIVIA token. Farming heroes help players gather resources and to push the progress of the game faster.

Defend heroes allowing the players' abilities to defend their own base. Attack heroes' abilities assist players in attack another player's bases.

Level-Up/Evolve Heroes. By using the in-game resources, players can level up their heroes anytime. Leveling up a hero just upgrades the heroes' skills and levels without changing the heroes's appearances. The players can develop a hero, not only upgrading the levels and skills of the hero but they can also transform the heroes' skill appearances, upgrade skin or purchase rare/premium/legendary skins.

Open Portal. Summon your heroes by opening portal using RIVIA token. Farming heroes help players gather resources and to push the progress of the game faster. Defend heroes allowing the players' abilities to defend their own base. Attack heroes' abilities assist players in attack another player's bases.

Attack. Players will use their troops like heroes, minions to strike other players' bases or play campaigns.

TOTAL SUPPLY
1,000,000,000,000,000

The Witcher Game was built as a fun and educational way to introduce the world to blockchain technology. Many of the original team members met playing Crypto Hero's, and it was their first time ever using Blockchain for anything other than pure speculation. They soon started working on The Witcher Game to introduce the magic of Blockchain technology to billions of players.

THE VISIONS

We believe in a future where work and play become one. We believe in empowering our players and giving them economic opportunities. Most of all, we have a dream that battling and collecting cute creatures can change the world. Welcome to our revolution.

THE ELEMENTS OF SUCCESS

For The Witcher Game and **RIVIA** to be successful, the project will need to be financially, socially, and environmentally sustainable.

We have identified 3 main focus points for pursuing these goals.

The Witcher Game unique tokenomics model is designed to promote equality, teamwork, and the long-term sustainability of the project. To secure the support of investors, it's necessary to maintain investor interest in the game and provide returns to holders.

The growth of projects, increased interest in the NFTs, and the holder's reward will incentivize long-term holding, increasing the value of the token.

TOKENOMICS

A diverse and highly motivated team is important to keep progress moving forward. Anyone with enough enthusiasm and dedication can become a leader. At the same time, the community will be involved in appointing board members to ensure that the team is composed of people who are well-qualified to help the project succeed. Board members will hold the keys to multi-signature wallets containing project funds, so our governance structure is designed to ensure the board is accountable to the community.

LEADERSHIP

The Witcher Game will be shaped by the will of the community. What the game becomes will depend on the ideas and efforts of the community. Part of the attraction of The Witcher Game is that it is a place to connect with a vibrant and diverse group of kind and accepting people. For this reason, it's important to maintain a high level of community engagement with the project. Involving the community in every step of the way, including selecting the game and developing projects on it will support this vision. In this way, each community member will develop a deeply personal connection to the game and each other, promoting long-term engagement and commitment to the project.

COMMUNITY

We want everyone to be involved in what is happening on the Game, encourage friendship and collaboration.
